SUNQUEST SUNDIAL To mark a precious moment, a place or a memory...

the exquisite Sunquest Sundial serves with beauty and charm. It forms a classic garden sculpture and keeps accurate time with the sun.

Fashioned from high-quality aluminum casting, sheet and fastener products, the sundial forms a unity of function and design. The metal, enriched by a clear anodized finish, endures the time it measures, remaining impervious to sun and rain.

The sundial measures 15 x 15 in. and 18 in. high, ideal dimensions for enhancing the beauty of patio, entryway or lawn settings—and for museum, planetarium and other institutional uses. Made by Richard L. Schmoyer, 335 Stony Battery Rd., Landisville, Pa. 17538, the sundial is made with aluminum components furnished by Whitehead Metals, Inc., an Alcoa distributor.
